Enabling advanced CLI on HP V1910 Switches. 10. August 2017 22. July 2016 by Michel. I always thought, that the command line of the Comware OS based 1910/1920 switches are limited because they are "cheap". But I found out to enable the full CLI to configure the devices like a 5000-series Switch.

Enabling advanced CLI on HP V1910 Switches - Network Guy

Recommended minimal configuration. In the factory default configuration, the switch has no IP (Internet Protocol) address and subnet mask, and no passwords. In this state, it can be managed only through a direct console connection. To manage the switch through inband (networked) access, the switch should be configured with an IP address and subnet mask compatible with the network.
